

Can I import your products into my shop system? Are the informations real time?

Yes, you can use our CSV file to import our articles into your shop system.

Therefore you have two options:

1. Download the file manually after the log in from the 'Product List' menu.
2. You can download the file automatically by using the following URL.

shop.mobileplus.de/index/articleslistcsv-v2?login_email=Username&login_password=password

Before you can use the URL it is important to change **Username** and **password** to your account settings. Only that way the csv file can be created and it will contain your personal discount directly.

The file is always created 'on demand' at that moment you start the download so all the content in the file is real time data.

The format of the csv file in detail:

Element in CSV	article_number	name_en	name_de
Meaning	Article number used by mobileplus	Article name (English)	Article name (German)

Element in CSV	description_en	description_de	description_html_en	description_html_de
Meaning	Article description in plain text, English	Article description in plain text, German	Article description with html format, English	Article description with html format, German

Element in CSV	box	euro_1	euro_5	euro_10	euro_25	euro_50	euro_100
Meaning	How is the article packed? (blister, bulk, etc.)	Price for 1 - 4 pieces	Price for 5 - 9 pieces	Price for 10 - 24 pieces	Price for 25 - 49 pieces	Price for 50 - 99 pieces	Price from 100 pieces
